

Disciples Of The Stars

Metalite

Through another endless night
We race across the sky
We travelled far from what we know
Without mercy
The elements fight back
We've got our sight on where to go
We've got our sight on where to go

In time - darkness turns to light
We bring the fire
No one - wants to live without
We'll take you higher

On and on - reaching far and wide
We're disciples of the stars
Take my hand - let me bring you in
We're disciples of the stars
Yeah!...

Wherever sorrow goes
Shadows cast their spell
On you
We bring a new day to look for
Just shout for mercy
Screaming in the dark
We are to ones who hear your call

For now - darkness find the light
We bring the fire
An now - riding trough the night
We'll take you higher

On and on - reaching far and wide
We're disciples of the stars
Take my hand - let me bring you in
We're disciples of the stars

Yeah!...
On and on - reaching far and wide
We're disciples of the stars
Take my hand - let me bring you in
We're disciples of the stars
We're disciples of the stars
Oh...
We're disciples of the stars
We're disciples of the stars
Take my hand - let me bring you in
We're disciples of the stars!
