

In My Dreams

Metalite

Like an halo in my mind
You surrounding me and make me feel alive
Another moment passing by
With an anxious sigh into the great divine

In a distant galaxy
You are whispering in my fantasy

On my way through space and time
On my way to find the one I've seen inside
Just to look into your eyes
I will find you in an interstellar sky

Like a hologram of light
In the dark you have been shining in the night
Like a tale that's never right
You are far away just like the satellites

I will find you in my dreams
Cause my dreams will come alive

On my way through space and time
On my way to find the one I've seen inside
To uncover and enshrine
I will find you in an interstellar sky

Things are never what they seems
(Never what they seems)
I will find you in my dreams

(Cause my dreams will come alive)
Ha ha

On my way through space and time
On my way to find the one I've seen inside
Just to look into your eyes
I will find you in an interstellar sky

On my way through space and time
(On my way through space and time)
On my way to find the one I've seen inside
To uncover and enshrine
I will find you in an interstellar sky

To a world a never been
(To a world a never been)
Through the oceans of my dreams
'Cause my dreams will come alive
