New Generation

Metalite

We're the ones who grew up with the screens
Technology have been our teens
We're independent and we're used to succeed
A generation that won't back down, we'll lead

The light in the sky
The chosen, they will speak for what's right

We are the new generation
And the future's in our hands
For the world, for the sky

We are the new generation
Our voices will be heard
We wont break or drop out

We're the ones who speak out for what's right
We won't accept the wrongs, we'll fight in the night

Here to challenge the norm
To challenge the norm
The generation that's here to transform

We are the new generation
And the future's in our hands
For the world, for the sky
For the sky

We are the new generation
Our voices will be heard
We wont break or drop out

The light in the sky
The chosen, they will speak for what's right

We are the new generation
And the future's in our hands
For the world, for the sky
For the sky

We are the new generation
Our voices will be heard
We wont break or drop out

We are the new generation
Generation for the world
And the future's in our hands
Generation for the sky
For the world, for the sky
Generation we'll break free
Generation for the rush

We are the new generation
Generation for the world
Our voices will be heard
Generation for the sky
We wont break or drop out

Generation, we'll break free

Generation for the world
