

## Outer Worlds

Metalite

The storm is running high  
A beam of light reflects in the shadows of the night  
The future's out of sight  
An interstellar outpost, ready to ignite

Once and for all!  
The stars will see the last one fall

The fight against the outer worlds  
We'll see them all collapse  
They got nowhere to hide  
The fight will change the outer worlds  
The empire will rise!

A conquest of the skies (A conquest of the skies)  
The outer worlds will rise and we'll see another life  
The future's looking bright (Looking bright)  
A world that will be ours, nothing more than light

The struggle moving on!  
We'll be the first who will change it all!

The fight against the outer worlds (Outer worlds)  
We'll see them all collapse  
They got nowhere to hide  
The fight will change the outer worlds  
The empire will rise!

Oh, oh, oh, ha, ha

The fight against the outer worlds  
We'll see them all collapse  
They got nowhere to hide  
The fight will change the outer worlds  
Outer worlds  
The empire will rise!

Oh ho, oh ho, oh ho oh

The fight will change the outer worlds  
The empire will rise!  
The empire will rise!
