

Alone

Metalium

Is someone out there or are we all alone?

Signals calling leaders
The universe seems dark and wide
Focus on the area
Where space offers new sights

Is there something out there
Big as our galaxy
The furthest thing we've seen
Scientists getting paralyzed
Your age, your shape, your colours
Sure you got more to offer
Kept your secret all your life

Wind and rain
Water, light and thunder
Not existing in your nights?

Share now your secrets with me
We're so far apart
Maybe you crossed our way long before our days
We're so far apart
Or are we alone? Yeah!

Wind and rain
Water, light and thunder
Not existing in your nights?

Share now your secrets with me
We're so far apart
Maybe you crossed our way long before our days
We're so far apart
Is someone out there or are we all alone?
