The Shade

I'm following the sun That's setting in the West We're floating on a bed of fading lights

A canopy of trees Bears witness to the breeze I'm falling like a feather, soft and light

Baby, there's no better time No better time, baby, we can't find Oh-whoa-whoa, oh-whoa-whoa

With eternal love, the stars above All there is and ever was I want it all, I want it all I want it all, I want it all A blade of grass, a grain of sand The moonlit sea, to hold your hand I want it all, I want it all I want it all, I want it all

The embers of a fire still burning as they die Stay bright to keep us side by side

Baby, there's no better time No better time, baby, we can't find Oh-whoa-whoa, oh-whoa-whoa

With eternal love, the stars above All there is and ever was I want it all, I want it all I want it all, I want it all A blade of grass, a grain of sand The moonlit sea, to hold your hand I want it all, I want it all I want it all, I want it all

We got the sunshine We got the shade We got temptation We got it made We got rewarded We got refused We got distorted We got confused We got the sunshine We got the shade I want it all, I want it all I want it all, I want it all

With eternal love, the stars above All there is and ever was I want it all, I want it all I want it all, I want it all A blade of grass, a grain of sand The moonlit sea, to hold your hand I want it all, I want it all

Metric

I want it all, I want it all
