

When I met you said I'd take it slow
Young and wild with no where to go
I'm always thinkin' bout you, are you thinking' bout me?
Where we stop we'll never know
I was, I was smooth-talking at the bar
You were looking like a star
Girl, we could go far
That was the, that was the night you met me
We got drunk off cheap vodka
In the night, no one can stop us

I could tell you were upset
When they turned the music down
When they turned the lights off
When they close the club down,
We can dance in the sunrise, she loves the night lights,
Let's just dance the night away

I feel like your savior, and I feel like your savior,
And I feel like your savior, and I feel

The morning after I was all alone, now she's gone
And won't pick up the phone
I feel I'm searching in the dark, let's go back to the start
We live fast but dance so slow

I was, I was, smooth talking at the bar, you were looking like a star,
Girl we could go far
That was the, that was the, night you met me, we got drunk off cheap vodka,
In the night no one can stop us

I could tell you were upset, when they turn the music down,
When they turn the lights off, when they close the club down,
We can dance in the sunrise, she loves the night lights,
Let's just dance the night away

I feel like your savior, and I feel like your savior,
And I feel like your savior, and I feel
(Woah)

Let your body just take control, you know music's gonna save your soul
(Save your soul),
I'll forgive you for whatever you do (whatever),
You turn the love from me and you

Let's go, I could tell you were upset, when they turn the music down,
When they turn the lights off, when they close the club down,
We can dance in the sunrise, she loves the night lights,
Let's just dance the night away

I feel like your savior, and I feel like your savior,
And I feel like your savior, and I feel like your savior
