

# We Could Be Something

Michael Bolton

Don't know how the spell was broken  
But you got me speaking words I've never spoken  
How did you do that?  
How did you do that?  
One heart drifting in the ocean  
Living in my own world, going through the motions  
That was all I had  
That was all I had

I don't want to waste more time  
You took me so long to find

And I  
I don't want to spend my life wondering  
Packing up my heart and just running  
And I  
I used to care a lot about nothing  
Now all I really know is this one thing  
Baby, you and I, we could be something

Love to watch you while you're sleeping  
You give me a reason, something to believe in  
Everything is better  
Everything feels better

I don't want to waste more time  
It took me so long to find

And I  
I don't want to spend my life wondering  
Packing up my heart and just running  
And I  
I used to care a lot about nothing  
Now all I really know is this one thing  
Baby, you and I, we could be something

Something so strong  
Something so right  
Baby, we could be something for the rest of our lives

And I  
I don't want to spend my life wondering

And I  
I don't want to spend my life wondering  
Packing up my heart and just running  
And I  
I used to care a lot about nothing  
Now all I really know is this one thing  
Baby, you and I, we could be something  
Something, something, something
