

# Higher

Michael Bublé

You know you have it, mmm  
You take a moment, make it magic, yeah  
The way you move is so dramatic  
I think I might make you a habit, ay

See all these faces, mmm  
So many numbers on your wait list, mmm  
You make me want to make some changes  
Drive me to drink, I'm drinking cases, yeah

Every step you take  
Everyone ever knew ya sings hallelujah

Whoa, because when you go low and I get higher  
When you move that slow, it lights my fire  
I might be falling for ya, I don't know (High)  
I think it might be what you came here for  
Whoa, when you go low and I get higher  
When you move that slow it lights my fire  
I'm at attention, I ain't got no shame (High)  
No inhibition, I'm just glad you came, whoa

Take a step into the light and flaunt it  
Leavin' everybody broken hearted  
God, it's a sauna, so hot  
The way you slide across the floor  
I think you know  
That I'm only going to beg for more

Every step you take  
Everyone ever knew ya sing hallelujah

Whoa, because when you go low and I get higher  
When you move that slow, it lights my fire  
I might be falling for ya, I don't know (High)  
I think it might be what you came here for  
Whoa, when you go low and I get higher  
When you move that slow it lights my fire  
I'm at attention, I ain't got no shame (High)  
No inhibition, I'm just glad you came

Stuck in this game you've started  
Don't leave me broken hearted  
'Cause I've got nothing left to lose

Whoa, because when you go low and I get higher  
When you move that slow, it lights my fire  
I might be falling for ya, I don't know  
I think it might be what you came here for  
Whoa, when you go low and I get higher  
When you move that slow it lights my fire

The way you slide across the floor  
I think you know  
That I'm only going to beg for more
