

Hands Up To The Sky

Michael Franti & Spearhead

I used to think that life was so easy
Had all the time and I gave it out freely
You never know what you have
Until it's gone gone gone

I never used to think bout the ending
Never thought about the light I was bendin'
I didn't know what I had til it was gone gone gone

So close your eyes
Throw your hands up to the sky
I got my feet here on the ground
While I float on a satellite
And should I die I know love was here tonight
Close your eyes
Throw your hands up, your hands up, your hands up to the sky
Throw your hands up to the sky

Away away away away away
Away away away away away
Away away away away away
Away away away away away

I think of all the years that have rolled by
We laughed and we cried and we got high
My heart's a little bruised but I'm still strong strong strong

So close your eyes
Throw your hands up to the sky
I got my feet here on the ground
While I float on a satellite
And should I die I know love was here tonight
Close your eyes
Throw your hands up, your hands up, your hands up to the sky
Throw your hands up to the sky

Away away away away away
Away away away away away
Away away away away away
Away away away away away

So close your eyes
Throw your hands up to the sky
I got my feet here on the ground
While I float on a satellite
And should I die I know love was here tonight
Close your eyes
Throw your hands up, your hands up, your hands up

Should I die I know love was here tonight
Close your eyes
Throw your hands up, your hands up, your hands up to the sky
