

People Need People

Michael Franti & Spearhead

This guitar needs six strings
Cause without it there's no song
And this house needs love in it
Cause without it there's no home
And there's one thing that I've learned
Through this year of bein' alone
I can feel it in my bones
More than anything I've ever known

That's people need, people need, people need people
People need, people need, people need people
We're all righteous and humble
We climb and we stumble
The strong and the feeble
No matter where in the world that you go don't you know that
People need people
People need people

We are all on the same road
Walking different directions
All cursed by the curses
And all blessed by the blessin's
With the reach of a hand or a smile for awhile
You can feel the connection
Even in the times when you think you're all alone, don't

Cause people need, people need, people need people
People need, people need, people need people
We're all righteous and humble
We climb and we stumble
The strong and the feeble
No matter where in the world that you go don't you know that
People need people

People need, people need, people need people
People need, people need, people need people
People need, people need, people need people

No matter where in the world that you go don't you know that people need people

And you got me like the ocean's got the waters
And I got you like mamas and papas got sons and daughters
And the stars got the sky so that they can shine down low
So no matter where in the world that you go
You will know that you're not alone

Cause people need, people need, people need people
People need, people need, people need people
People need, people need, people need people
No matter where in the world that you go don't you know that you're not alone
No matter where in the world that you go don't you know that you're not alone
Cause people need people
People need people
