

## Dancing With Angels

Michael Grimm

There's a warm wind tonight  
It makes me feel like you're right by my side  
Caressing my face like your fingers once did  
On the edge of a dream and I'm gonna fall in

There's a star shining down  
Makes me feel like you're watching me now  
I wish I could hear what you're trying to say  
Wish I could find the road to yesterday

You said that fireflies were angels of light  
And moonbeams were highways that we could both ride  
I couldn't follow you into the fire  
But I know in my heart you're alright  
Cause you're dancing with angels tonight

I could still taste your kiss  
Cotton candy from the fair on your lips  
We made a vow by the light of the moon  
Then dreams can't survive when they're written too soon

I'm doing fine can't you see  
It only hurts every time that I breathe  
This isn't the way that the story should end  
This kind of hurt takes forever to mend

And you said that fireflies were angels of light  
And moonbeams were highways that we could both ride  
I couldn't follow you into the fire  
But I know in my heart you're alright  
Cause you're dancing with angels tonight

Send down a sign I can see  
Show me the light  
Give me the strength to believe

You said that fireflies were angels of light  
And moonbeams were highways that we could both ride  
I couldn't follow you into the fire  
But I know in my heart you're alright  
Cause you're dancing with angels tonight

I could still taste your kiss  
Cotton candy from the fair on your lips
