

Not So Distant Day

Michael McDonald

Baby, you undo me
As I lay my heart down
You whisper things I can't repeat
You don't make a sound
Babe, you look right through me
I'm naked to the bone
You see my intentions
The right inside my wrong

And I can see the love we'll make
On that not so distant day
I can feel my heart unbreak
As the pieces fall into place
Lead my soul into your waters
And I'll never sail away
I can see the love we'll make
On that not so distant day

Baby, you can heal me
Help me to come clean
I know you can show me things
That eyes have never seen
You can take me to that higher place
Where senses can be free

And I can see the love we'll make
On that not so distant day
I can feel my heart unbreak
As the pieces fall into place
Lead my soul into your water
And I'll never sail away
I can see the love we'll make
On that not so distant day

Oh girl, you gotta listen to me
Gotta wake up, gotta move on
The bus is leaving and
My memory is starting to fade

I can see
I can see the love baby

Lead my soul into your water
And I'll never sail away

I can see the love we'll make
On that not so distant day
And I can feel my heart unbreak
As the pieces fall into place
Lead my soul into your water
And I'll never sail away
I can see the love we'll make
On that not so distant day

I see the day
