All Night With The Lights On

Michael Monroe

Scared straight from my heart
The way you fake your love in the dark
I wanna face the truth
Bright from the start
It won't do much good
If we're worlds apart
We'll get through it

All night with the lights on
I'm too scared to turn my back on you
All night with the lights on
I gotta see it through

I won't give the devil the pleasure
To see me crack under pressure
The shadow of a doubt
'Cos I can't rest
'Til all the facts come out
So we're spending

All night with the lights on
I don't dare to turn my back on you
All night with the lights on
I gotta watch everything you do
All night with the lights on

In the shadows of the night
I get a real fright
That's why I gotta keep the lights on all night
All night with the lights on
I'm too scared to turn my back on you
All night with the lights on
I wanna watch everything you do
All night with the lights on
I'm here for life, gotta live it through
All night with the lights on
All night, all night

I wanna live to see the morning light
Baby baby I'm dying of fright
It's a long life, gotta live with myself
I can't tell if it's heaven or hell
