What I Needed Most

Michael Monroe

I didn't know what I needed
I only know I needed something
A little help with life's puzzles
A chance to be myself in the light
And when I need it the most
A listening ear or guiding hand
A word or two in the right direction

CHORUS
Then I found a house I could call a home,
For a while or a place to learn and be and grow
A place full of love and open arms

I found some people I could call my own

Understanding and a feeling that I'm not alone
It's what I needed most to move on to now

You can get caught in the middle
When everything seems like a riddle
And you don't like the game
Everyone is playing
Well all I wanted was to be real
And understand the things I feel
And to feel like I have some direction

Chorus
