

# Light That Ever

Michael Nau

I just want take a peek  
And dance with you  
Wake up somewhere naked  
In a brand new mood

In every light that ever was  
In every light that ever was  
In every light that ever was  
In every light that ever was

Come now darling, come now, come down  
You're riding on a flood  
And running out of blood  
Well I know it doesn't make the world go round  
I know it doesn't make the world go round  
Dare try and tell that to my heart  
What does and doesn't matter

While it floats in every light that ever was  
In every light that ever was  
In every light that ever was  
In every light that ever was

Oh I know it doesn't make the world go round  
I know it doesn't make the world go round  
Dare try and tell that to my heart  
What does and doesn't matter

While it floats in every light that ever was  
In every light that ever was  
In every light that ever was  
In every light that ever was
