

Running Blind

Michael Patrick Kelly

Far from over, world on your shoulders
And all you feel is pain
The battle's endless, you're almost breathless
But everything's at stake

And when there are no clear roads to find
And you're out there waiting for a sign
And when there is no one by your side
Trusting your heart to see the light

Wherever you are, have faith in the dark
When you're running blind, when you're running blind
Now you've come so far, against all the odds
Keep running blind, keep running blind

Keep running blind, blind (Keep running)
Oh, keep running blind, blind (Keep running, keep running)

You write your pages and plot the changes
But life has different plans
You might lose your nerve, you might hit some tight curves
But don't you fold your hand

And when there are no clear roads to find
And you're out there waiting for a sign
And when there is no one by your side
Trust in your heart to see the light

Wherever you are, have faith in the dark
When you're running blind, when you're running blind
Now you've come so far, against all the odds
Keep running blind, keep running blind

Keep running blind, blind (Keep running)
Oh, keep running blind, blind (Keep running)

And when there are no clear roads to find
And you're out there waiting for a sign
When there is no one by your side
Just know that I'll be there right behind

Wherever you are, have faith in the dark
When you're running blind, when you're running blind
Now you've come so far, against all the odds
Keep running blind, keep running blind

(Keep running blind, blind) Keep running
Keep running (Blind, blind)
Keep running blind, keep running blind
