

# Stay Out Of It

Michigander

Here we go again  
Time to bite my tongue  
We've been stuck in this cycle for long enough  
Tried to save my breath  
Maybe just this once  
We could forget about it and just move on

I don't know where we're going  
But I don't care as long as I'm with you  
With you

It feels like everybody's talking  
But nobody's ever listening  
And it breaks my heart because I know I can't stay out of it  
Stay out of it

You know better, bro  
Not to mess it up  
Act your age but it still might not be enough  
No more safety nets  
They're all watching us  
Only silence inside of an empty love

I don't know where we're going  
But I don't care as long as I'm with you  
With you

It feels like everybody's talking  
But nobody's ever listening  
And it breaks my heart because I know I can't stay out of it  
Stay out of it  
Stay out of it

Well I don't know where we're going  
But I don't care as long as I'm with you  
Well I don't know where we're going  
But I don't care as long as I'm with you

It feels like everybody's talking  
But nobody's ever listening  
And it breaks my heart because I know I can't stay out of it  
Stay out of it  
It feels like everybody's talking  
But nobody's ever listening  
And it breaks my heart because I know I can't stay out of it  
Stay out of it  
Stay out of it
