

This Type Love?

Mick Jenkins

[Woman:] Do you think there are like different ways to well, obviously there's different ways to love someone but have you ever..., I know you been in more than one relationship

[Mick:] But are-...

[Woman:] Do you feel like you loved someone different than some one else?

[Mick:] I was about to say, but are there different ways to love someone? My friends but I borderline would, I probably would do it for them too. You know what I'm saying? Like, it is...I don't...and I would do it for y-, for-...I would have done that for Kendra, you know what I'm saying? I would do- do it... I would do it for someone I wanna do it for, like I would...you know what I'm saying? Like, it's not really...Then there's things that like I wouldn't do..you know what I'm saying? That I would do for you. So- so- so- so-...but I just feel like if I got love for you, I got, I got love for you like it's thorough. You know what I'm saying? But..

[Woman:] Okay but

[Mick:] I guess there's levels, there's definitely levels

[Woman:] But, so still like back to the ...the original question, like have you, okay have you been in love more than once? [Mick:] Romantically?

[Woman:] Yeah

[Mick:] F-, Yeah

[Woman:] So...in any of those situations do you feel like you've loved one person different than the other?

[Mick:] No. Damn now that I'm thinking bout it, I guess I was more on fire in my last relationship like...for sure. I was definitely way more, yeah I guess I loved her diff- diff- diff- diff- diff- for sure. I never really think-, I, that's what I'm saying I don't really think about it like that so I, my first reaction is to be like m-m-m

[Woman:] Yeah I don't...and it's not like a, I'm true, like it's a choice for you

[Mick:] That's what it makes it seem like

[Woman:] Yeah, no, it's not a choice for you to love someone differently but, I feel like, the right person can make you...feel different than you've ever felt with anybody else and so you..essentially you, you love them different

I don't know that sounds weird to me
