

I Still Do

Mickey Guyton

White sheets, sun beams
I feel you breathing, honestly, yeah
It feels like a movie scene to me

If I had a thousand words
I would take a picture
But it ain't worth it
You got me speechless
'Cause you take the breath out of me

And I said I'd love you forever and a day
And I said I'd love you 'till the whole earth quakes

And I still do
And I always will

You took me borrowed and blue
Broken and bruised
Boy you loved me like, like I was brand new
You showed me a love like I've never known

I said I would love you when I'm a hundred and eight
Or when I'm weak, when my whole body aches
And baby that's a promise I'll never break

And I still do
And I always will
And I still do
And I always will

When the sky is falling down
When both our hearts are underground
And if you're wonderin' how I'm feelin' now

I still do (I'm gonna love ya baby)
And I always will (I'm gonna love ya baby)
And I still do (I'm gonna love ya baby)
And I always will (I'm gonna love ya baby)

And I still do
And I always will
