

Please

Middle Kids

I know it's hard but you've gotta see this
Don't fall asleep or you're gonna miss it
In the grit but you're closer than you know
Your body's stuck here with it's diseases
Will we survive or live in fear
Surely there is somewhere else to go

And I was surprised when you came over to say goodbye
And you said "Who was I to hope" and I said

Please, please come back to me
And I said
Please, please come back to me
I'm sorry I forgot it

I know you're doubtful but I'm believing
I bet you questioned everything you
You can't adjust and you'll never change you know

And I was surprised when you came over to say goodbye
And you said "Who was I to hope" so I said

Please, please come back to me
And I said
Please, please come back to me
And I said
Please, please come back to me
And I said
Please, please come back to me
I'm sorry I forgot it
