

Kiss That Girl

Midnight Oil

Creature rise up from the deep
And walk on dry land on all fours
Throw your demons to the wind
Matinee crowd they want to see you crawl

I can't explain the difference
Between a tadpole and a frog
Somewhere in the marshes
See a toxic cocktail has been spawned

Now if you kiss that girl
You could lose the lot
Everything you've got
If you kiss that girl

If you kiss that girl
You could lose the world
You could shut up shop
With everything you've got

So much promise in the first born
Crying naked like new life
So much promise, fall in love first time
Red petal lips gonna make you cry

Now if you kiss that girl
You could lose the lot
Everything you've got
If you kiss that girl

If you kiss that girl
You could lose the world
You could shut up shop
With everything you've got
If you kiss that girl
Now if you kiss that girl

Jekyll and Hyde in equal supply
Got so satisfied, well my, my, my
Jekyll and Hyde in equal supply
So satisfied, well my, my, my, my, my, my, my

Saaaaaaay!

Now if you kiss that girl
You could lose the lot
Everything you've got
If you kiss that girl

You can fool the world
But can you fool yourself?
Can you sing the words
Like you're someone else?
If you kiss that girl
If you kiss that girl

1-800 time

Got the wasted rhyme
Well she's staring down
Your production line

Well you can fool the world
But can you fool yourself?
Can you sing the words
Like you're someone else?

If you kiss that girl
If you kiss that girl
Kiss that girl
Kiss that girl
