

Electricity

Midnight Star

Electricity

I got the power to energize
I got the power to magnetize
I'll fill you up with my energy
You'll be my toy, I'll be your electricity

You've got my head all wired up
It seems I never can get enough
My gears are running mighty hot
It feels so good, don't you ever stop
You never let me touch your lovely body
You make me hot and I wanna party
So won't you come a little closer to me
You'll be my toy, I'll be your electricity

(Electricity) Let me charge your battery, baby
(Electricity) Energize me
(Electricity) Use me
(Electricity) I'm your utility, baby

Well, come on, energize me

You got the key, remote control
I'll be your slave, mind, body and soul
Just plug me up and let the party begin
We'll dance all night, never let it end
So hit the switch, baby, let the juice flow
I'm good for you, baby, this you know
So won't you come a little closer to me
You'll be my toy, I'll be your electricity

(Electricity) Energize me
Electricity
(Electricity) Don't you wanna turn me on?
(Electricity) You turn me on

You got the power to energize (Energize me)
You got the power to energize (Energize me)
Do it to me with your energy (Oh) I wanna be your electricity

(Electricity) Energize me

I got the power to energize
I got the power to magnetize
I'll fill you up with my energy
You'll be my toy, I'll be your electricity
(Say it loud!) I got the power to energize
(Say it loud!) I got the power to energize
(Say it loud!) I got the power to energize
(Say it loud!) I got the power to energize

Electricity
Electricity
Electricity
Electricity

You got the power to energize (Energize me)
You got the power to energize (Energize me)
Do it to me with your energy (Oh)
I wanna be your electricity

(Electricity) Energize me
Electricity
(Electricity) You say you need a jump
(Electricity) Come on, energize me
Electricity
Electricity
Electricity
