

Make It Last

Midnight Star

I've got something good for you
It's free of charge and it's overdue
There's no need to doubt or fear
Cause I am love and love is here
Standing by to fill your need
Satisfaction guaranteed
If you don't believe I can satisfy
Then take a chance and give love a try

Now you will find
I'm not the kind
Of man who only teases you
I can groove all day
And move all night
Until you tell me baby that we are through

I can make it last
I just want to make it last
I just want to make it last
I just want to make it last
I just want to make it last

Now that you are here with me
Open up so I can see
All the things that turn you on
That move our feets [?]
Love is good and you know it's true
When you do the things you do
Don't stop now we've just begun
Making love with you is so much fun

Now you will find
I'm not the kind
Of man who only teases you
I can groove all day
And move all night
Until you tell me baby that we are through

I can make it last
I can make it last
Make it last
I just want to make it last
I just want to make it last
I just want to make it last
I just want to make it last

Talking 'bout the good times
I just want to make it last
Sing this song for love now
Can you believe
I've got something good for you
Please don't let love slip away

I just want to make it last

I don't wanna tease you
I'm only here to please you
