Gravity

Miguel

Make a wish, yeah, make a wish

Lady, I'm certain that I dreamt you
Overnights suspenses, leaving me defenseless
All these late nights lost in my emotion
Searching for devotion

Someone I could laugh with out loud
And love amidst the empty space in my heart
I could leave with no doubt
I feel invincible when we create this art, baby

I'm just a shooting star, the way you pull me and move me
Afar don't seem so far, your love is gravity

Two hearts hung amongst the heaven
You and I were destined to collide
I'm open wide and these eyes, fixed upon a vision
You are all I'm missing

Someone I could laugh with out loud, yeah
And love amidst the empty space in my heart
I could leave with no doubt
I feel invincible when we create this art, baby

I'm just a shooting star, the way you pull me and move me
Afar don't seem so far, your love is gravity

Caution collision oh, caught up compelling for
Long as it's you I want to
Take a deep breath, it's time to let go and close my eyes
What am I waiting for, here I go

I'm just a shooting star, the way you pull me and move me
Afar don't seem so far, your love it's gravity
I'm just a shooting star, the way you pull me and move me
Afar don't seem so far, your love is gravity
