

Can I surrender to you
All my defenses are down
It hurts to be human

This could be heaven or hell
Been trying to figure it out
It hurts to be human

I rip
When the weight bears down
Before I get
Edgy on my empty oscillations
And I'm ready to Gun
I rip when the weight bears down

I rip
When the weight bears down
Before I get
Edgy on my empty oscillations
And I'm ready to Gun
I rip when the weight bears down

Some nights you dance with tears in your eyes
Some days you smile with pain in your heart
Is peaceful in the eye of the storm
I kill the chaos rip the weight from my heart

Stumbling in the dark for a cure
Somehow I know there's gotta be more but so...

I rip
When the weight bears down
Before I get
Edgy on my empty oscillations
And I'm ready to Gun
I rip when the weight bears down

I rip
When the weight bears down
Before I get
Edgy on my empty oscillations
And I'm ready to Gun
I rip when the weight bears down

Can I surrender to you
All my defenses are down
It hurts to be human

This could be heaven or hell
I'm trying to figure it out
It hurts to be human

This could be heaven or hell
I'm trying to figure it out
It hurts to be human
