

Stay High

Mika

What comes up must come down
I learn it in my science class
No, I'm not that dumb
Your fingertips (Your fingertips) upon my skin (Upon my skin)
You bring sunshine to my window, baby let it in

Wherever we go, I wanna stay high not low
Wherever we go, we're gonna get higher than the sun, my baby
Wherever we go, I wanna stay high not low
Wherever we go, we're gonna stay high

What comes up (What comes up)
must come down (Must come down)
But you and me, we're floating above the ground
Our generation (Our generation)
has so much gloom (Has so much gloom)
'Cause there ain't no money left after the baby boom

Wherever we go, I wanna stay high not low
Wherever we go, we're gonna get higher than the sun, my baby
Wherever we go, I wanna stay high not low
Wherever we go, we're gonna stay high

Don't let me down
Not now 'cause I've been high for so long
That I don't know how to come down
Don't try, I don't even care if you lie, you and me
Don't let me down
Not now 'cause I've been high for so long
That I don't know how to come down
Don't try, I don't even care if you lie, you and me

We're gonna stay high
We're gonna stay high

Wherever we go, I wanna stay high not low
Wherever we go, we're gonna get higher than the sun, my baby
Wherever we go, I wanna stay high not low
Wherever we go, we're gonna stay high (We're gonna stay high)

We're gonna stay high, high, high, high (Higher)
We're gonna stay high, high, high, high
We're gonna get high, high, high, high (Higher)
We're gonna stay high, high, high, high
We're gonna get high, high, high, high (Higher)
We're gonna stay high, high, high, high
We're gonna get high, high, high, high (Higher)
We're gonna stay high, high, high, high
We're gonna get high, high, high, high (Higher)
We're gonna stay high, high, high, high
