

Champagne Colored Diamonds

Mike G

Get with it I put on a show ladies and gentlemen
See me heating up start your engines
I can't believe what you done started but I'm into it
You can't believe that we started this then I'm a finish it

Said it then I meant it
I ain't new to this shit I maneuver through this
They think we all racing to the finish
It's bliss in cluelessness, what you gon do with this here
I'm rooted in this, so much I gotta tend to it
I get very into it, I have to bury my mood
And then they judge me like a jury would do
Me and my crew making serious moves, and I'm serious
Too many times they mistake my kindness for timidness, foolish
Thinking of times you gain so much it ain't no sense you would lose
Two things can be true, I make something from nothing cook it up and bring i
t to you
But it's nothing, every day the way that we move
Advice is the only thing I ain't taking from you, I been through the zoo
Had to observe how the animals move
Watch and learn and in turn the standard can move
My demands commanding the room

And now my phone ringing like...
Things gon always be the same, til you up to make a change
And I know I ain't living right
Make money a thousand ways, I'm swerving through the lane
Hearing thangs from the other side
Is it what you make or the chances that you take?
You want Champagne colored diamonds
You want Champagne colored, Champagne colored

Thinking of times you gain so much it ain't no sense you would lose
Two things can be true, I make something from nothing cook it up and bring i
t to you
But it's nothing this is every day the way that we move
Three stacks will change somebody life, for less they will move
We stay praying for light
Make a way just to make this thing right
You keep saying what you ain't gonna do, they waiting for moves
My life just can't get it right
Stay breaking the rules
Working a 9-5 is what I ain't gonna do
That ain't what got my Porsche Daytona blue
I learned that I just can't be waiting for days to improve
Feel like you out of time never outta space to improve
Obstructing justice, tell them that we up an since
Learn to break down walls since I knew I'd be back up against them
Couldn't spare nothing but that ain't up for discussion with them
Use less I knew that I couldn't do nothing with them

Now my phone ringing like
Things gon always be the same, til you up to make a change
And I know I ain't living right
Make money a thousand ways, I'm swerving through the lane
Hearing thangs from the other side
Is it what you make or the chances that you take?

You want Champagne colored diamonds
You want Champagne colored, Champagne colored
You want Champagne colored diamonds
