

# Good Luck With That

Mike G

Porsches & i8's coming so, you ain't coming back  
We tend to ignore all the problems that come with that  
So good luck with that, good luck with that  
I said good luck with that, good luck with that

Here's something you gotta know, I'm stuck off in battle mode  
Whenever I'm in the zone, I put my power forward  
I ain't come in alone, that's just how it's gotta go  
Felt I just got a home and got pushed out the door  
We know to fly by the rules, what truth can hype buy ya?  
Jewels, my type light up  
Words my type writer  
Shame when companies don't want my type hired  
Red alert, lights light up  
Shawty my type, rider  
Past riots make me want to take it past violence  
Said it with understand and hoping that they'll find you  
They even call me great in Chicago, I'm that fire  
We aim higher, that's just the plane that I pilot  
They stop and stare whenever they see that ride up  
My show is magic, make your venue staff light up  
Had to go over the curb like bad drivers  
My drive is all for will, the path finder

I see you running so, no you ain't coming back  
We tend to ignore all the problems that come with that  
So good luck with that, good luck with that  
I said good luck with that, good luck with that  
Good luck with that, can we have some fun with that?  
Fakes be fronting but I don't fuck with that  
Good luck with that, good luck with that  
I said good luck with that, good luck with that

Speaking on what you lack, will make you numb in fact  
That's something I ain't feeling but I ain't touching that  
Bully the game I may as well put a gun to rap  
If you tell me something that, you not coming back  
That's not an easy workout like jumping jacks  
So good luck with that, I said good luck with that  
I said good luck with that, good luck with that  
Good luck with that

Yo, I'm dealing with highs and lows  
You can see the picture, never how it goes  
How far we expect to go if people with power fold  
Trying to get a grip on things beyond our control  
Always concerned with what you be on, I would know  
Stuck off in passive mode  
I'm Mike G, this beat sound like Versace robe
