

Lights On

Mike G

Lights on
Say girl I hit you with the lights on
I've seen a lot ain't nothing like yours
Niggas want to fight for
That's why I hit you with the lights on

Can me and you see how much trouble we can get into
You got niggas to pick and choose
Won't play the fool. Won't play with your mood
It's never too much for you. Got me watching how you move
Ooo I'm tryna finish what we started in the living room
Hit the town and paint it blue. I go deep that's navy rules
I hold it down like anchors baby you ain't get the news
She in love with a nigga cuz he paid in full
Paid his dues. Run it back throw it back I just wanna keep this pace with yo
u

Because smoking alone look like clouds in my home
Wit no clouds in my stones. I ain't gonna do you wrong
Make you proud how I go for long, we can play your favorite song
Baby turn the lights on, yeah

Lights on
Say girl I hit you with the lights on
I've seen a lot ain't nothing like yours
Niggas want to fight for
That's why I hit you with the lights on
Say girl I hit you with the lights on
I've seen a lot ain't nothing like yours
Niggas want to fight for

I ain't got time to wait
Got my hands around your waist
Said I ain't got time for breaks and nothing is breaking my concentration
I'll just take this time to say
My watch face, glowing in the day
And it shows the lunar phases baby that's just time and space
Take you to my hide away, my favorite place
The view you gotta take it in first I know this ain't a race
You're contagious I want what you got. Turn you on
Play the right song
I'm wondering where the times gone
Because you know

Smoking alone look like clouds in my home
Wit no clouds in my stones. I ain't gonna do you wrong
Make you proud how I go for long, we can play your favorite song
Baby turn the lights on

Lights on
Say girl I hit you with the lights on
I've seen a lot ain't nothing like yours
Niggas want to fight for
That's why I hit you with the lights on
Say girl I hit you with the lights on
I've seen a lot ain't nothing like yours
Niggas want to fight for
