Mike G

I got a ex that say she hate me and she still callin  
I gotta keep it to myself that's how I feel often  
Put out that fire long ago and I'm still coughing  
Hop in my whip I hit the clutch and then I peel off  
Awarded with nothing less than best dressed  
Keep something on deck that's just to impress  
Getting familiar with death as I'm taking each step  
With things on your chest you find ways to express  
You gon see that nobody should tell you how to live  
After tips they give we still have to coexist  
I'm just trynna build a bridge for these kids  
Cause the world generously gives nothing but negative  
And energy's precious I mean like stones on a necklace  
I'll go uncontested I mean like medals on veterans  
In sessions I step in the rings as they glisten  
You know what everybody says  
And I talk that bread so it's worth a listen  
And I know, said I know that this world is so cold  
You got heart made of gold keep your eyes on the road  
Reach highs sometimes for those that just try to take you low  
I know a place we can go, let's go

What are we here for?  
It's not to be dormant, think it's to explore  
I don't feel the hate I think we must adore  
Settle the score you settle for more  
Say that I was second guessin til I was labeled a secret weapon  
Never hesitant that's when you're labeled as a professional  
Know you create destiny everything is left to you  
Become more than the attributes they attest to you  
I'll treat you like the world and I'll take nothing less than you  
No telling where the rest would be  
This is just what I need  
My plan to succeed  
Believe in me like the air that you breathe  
How you feel the sound it's more than you see  
How it feels to have mutual patience to agree  
After being we see, where this road will lead  
When blood on the leaves we set fire to trees  
Then we make it spread when they call the FD  
In awe when you see it was done intently  
Upon entry send fleets in a frenzy  
With no means of peaceful assembly  
With no direction then you're driving blind  
But in that you'll have time to find  
How some people wait for the stars to align  
You waited for greatness. Me in my prime
