

## Texas

Mike G

My chops make your ship steer off course  
Yo I wave, And they're impressed by my elemental force  
Of course I bring the worst to whoever want whatever  
Swore I'll be hotter than whatever if you leave it in the desert

My crowd wild, don't style for free  
And if someone is talkin' money, point 'em out to me  
What's a microphone genius without "Mike G"  
And "awesome" without "me" is just not complete  
That's why you see me walk around like this  
With ambition as big as every continent  
So I'll never suffer from lack of confidence  
If I focus on all my accomplishments

Yo I do it  
Just to say you too could do what you want  
My vision's clear as my conscience  
My energy's on Monster  
And no one will let me get over it  
I must dream the biggest til I'm stackin' digits  
And my women resemble Rihanna  
But still, I'm raps new hope with no second guessing  
I roll with a few hopes and hopeless obsessions  
I can tell we raise hell when we break out of our shell  
So saying we can't excell is like fishing in wishing wells

My crowd wild, don't stop for free  
And if someone is talkin' money, point 'em out to me  
Hard work usually pays a price without a fee  
So I must be the lyrical form of alchemy  
That's why you see me walk around like this  
With ambition as big as every continent  
So you could never suffer from lack of confidence  
If you focus on all your accomplishments

I train on tracks til I'm jumping over hurdles  
Doing laps in parking lots as murder in black convertibles  
You look forward to places that I've been  
Past ten once again, tell a friend I get in at 8: 10  
Life's a waste if you don't apply what you observe  
You should pay what you're worth, that's how you get what you deserve  
Use Logic to fill my pockets  
Bank a billion off of words  
Steer well til' my brakes fail and wheels hit the curb  
And they tell me life's short so cherish the days  
And now we're all over magazines front page's  
And this is fire coming out the speakers when it plays  
And I can rap for days when I get beats from Ace... aye!
