

Cabo

Mike Stud

We got high
We got high
I need ice in my cup

Ladies just turn the lights on
Telling us it's time to go home
But we both down for whatever
Down to be alone together
We've never been so awake
Until we took a look at the moon, yeah
Hoping we could stay up forever
But either way we're gonna remember

When we got high in Cabo
Made friends with the stars
Got drunk with the locals
Now they know who we are
And pulling on the bottle
Chasing with the dark
Ain't worried 'bout tomorrow
Right now is all we got

Everywhere that we go
Doesn't seem so far
We've been always looking up though
Maybe that's just gonna fall
But maybe me and you we don't need them at all
And maybe me and you should stick together
Tryna figure out what it means to live
Everybody I know
Can I just live, live a little bit
Got a drink, poured strong and a cigarette hit, yeah
Can I just live, 'cus we all gonna die
Living to live, it's hot outside
But the city makes us colder
And everyone knows we're losing time
So it's time to get closer
And nobody's sober
Bodies still rolling
Nowhere to go
And no-one goes home
And everyone's close
But we still know, we know where we're going

We got high in Cabo
Made friends with the stars
Got drunk with the locals
Now they know who we are
And pulling on the bottle
Chasing with the dark
Ain't worried 'bout tomorrow
Right now is all we got

Well, I don't wanna know why everybody's so worried
Worried bout things we can't control
Now I wanna know everybody in a hurry
But no-one knows where we're going

Like, we really living on the mother fucking stars
Seven billion people in the world
And me and you are sitting here in this bar
Talking 'bout all the things in the world we want
And we both rather find them in the dark
I see your light when it's after dark especially
And I know you 'gon remember me, even after I'm gone
When you connected with that energy

When we got high in Cabo
Made friends with the stars
Got drunk with the locals
Now they know who we are
