

# Midnight

Mike Will Made-It

Closer and closer until we fall (We fall)  
The space that we keep was just default (Default)  
But I know it won't be long (Be long)  
Till we touch the sun is gone (Is gone)  
Want it, I need it, feel it  
Want it, I need it

Closer and closer until we fall back  
I want it, I need it, you see it, you know that

Keepin' me calm now  
I just lost all control  
Keepin' me calm now  
I just lost all control  
Keepin' me calm now  
I just lost all control  
Keepin' me calm now  
I just lost all control

Midnight, met her at her room at midnight  
Midnight, met her at her room at midnight  
Comin' from the inside, I really wanna spend time  
I put her on the next flight, I let her live her best life  
You can do what you want to, do whatever you want to  
I know the choices you gon' choose  
Once we join forces we won't lose  
Roll like a coaster, don't stop, ooh  
She walked out your life with some nice shoes  
Paid off Rolls Royce and some iced jewels  
I might talk but I know you are gone on your own  
No mysteries on my own, you deserve you a home  
And I earned me a crown, from the curb we done grown  
I want it, I need it, don't you see it

You know that's when I start to lose control  
Takin' all my clothes  
Don't you let me go  
Don't you let me  
That's when I start to lose control (I just lost all control)  
Takin' all my clothes  
Don't you let me go (I just lost all control)  
Don't you let me

Closer and closer until we fall back  
I want it, I need it, you see it, you know that
