

Dambe

MIKE

Yeah

Yeah

I hope you glisten where the stars stay
Be sitting by your arm, I get to listen to your heart play
An artist, but nowadays that rhythm give me heartache
And hardships, I'd love to feel your spirit after long day
In car trip

My brother, know I'm with you for the long way
The farthest, I know you with me even know it's wrong bae
Regardless, I know I'm pulling strings inside your heart base
Guitar pick, I pray to rule the city like Scarface
Some Czar shit, nobody showed me pity 'til the bars came
Apartment where niggas on a different page but need somewhere to
o park quick
No, you can't see a bitter rage but that don't mean I'm harmles
s
Desire in a bitter hate, refill me when I'm starved
It's the fight in my feelings made, never gave me darkness

My brother, know I'm with you for the long way
The farthest, I know you with me even know it's wrong
Regardless

Pulling strings inside your heart base

The eyes have been painted with the white clay
The color tells us the beautiful and pure
Around the chin, are leopard teeth
They aren't real, they're made out of a metal called "brass"
The teeth reminded everyone that the forest, where lived, can be
e a fierce place
