

War

Milk Inc.

Gone are the nights
When all we needed was some candlelight
And we were in heaven
Gone are the days
When all you thought about was finding ways
To be by my side

But what have you done
What have you done
What have you done for me lately
What have you done
What have you done
What have you done for me lately

It's like we're at war
But we forgot what we were fighting for
Can't you see that I would fight for you, fight for you
But will you fight for me
I would fight for you, fight for you
But would you

What's on your mind
That's so important that you cannot find
Any time for me
What's going on
'Cause all the nights we talked from dusk till dawn
All behind us now

What have you done
What have you done
What have you done for me lately
What have you done
What have you done
What have you done for me lately

It's like we're at war
But we forgot what we were fighting for
Can't you see that I would fight for you, fight for you
But will you fight for me
I would fight for you, fight for you
But would you

But what have you done
What have you done
What have you done for me lately
What have you done
What have you done
What have you done for me lately

It's like we're at war
But we forgot what we were fighting for
Can't you see that I would fight for you, fight for you
But will you fight for me
I would fight for you, fight for you
But would you

It's like we're at war

But we forgot what we were fighting for
Can't you see that I would fight for you, fight for you
But will you fight for me
I would fight for you, fight for you
But would you
