

Rush

Milky Chance

I've been running in circles with the moonlight
With the moonlight all around
I just keep on facing up the true side
Oh, the true side of my own

Throughout the day broken bridges burn
They make me wanna turn around
Thoughts just keep on drowning in my blue mind
In my blue mind, all the time
So then

I feel rush
In my own blood
I'm holding on
The cold is gone
Chances are
My sorrows start
To fade away

This time it got me night and day
Oh, it got me every day
This time it got me night and day
Oh, it got me every day
Every day

Lately I woke up with that old feeling
That old feeling chasing me
Still there is a wonder of a meaning
I start believing what I've seen

Throughout the night, many mysteries
No necessities just fade away
Thoughts just keep on drowning in my blue mind
In my blue mind, all the time
So then

I feel rush
In my own blood
I'm holding on
The cold is gone
Chances are
My sorrows start
To fade away

This time it got me night and day
Oh, it got me every day
This time it got me night and day
Oh, it got me every day
Every day

On avait rêvé de ça ensemble
On avait rêvé de ça ensemble
Et maintenant que nos vies ressemblent
À tout ce qu'on a imaginé
Sans toi il n'y a pas de sens
Sans toi il n'y a pas de sens
Oubli sur les médailles gagnées

Oubli sur les médailles gagnées

This time it got me night and day
Oh, it got me every day
This time it got me night and day
Oh, it got me every day
Every day
