

# I Know About You

Milo Greene

I saw the flight is breaking  
Caught hands on the shore  
It moves water beneath us  
And I never thought you would show here

I know about you

You're a sketch you emotion  
But I come prepared  
No sign of a entailment  
No I won't barely leave this alone, no

I know about you

You thought that emotion went over my head  
And my heart wouldn't beat no more  
But you were the reason for the weight on my chest  
And my heart wouldn't beat no more

You watch me burn in the fire  
I should've known all along  
You watch me burn in the fire  
I should've known all along  
You watch me burn in the fire  
I should've known all along  
You watch me burn in the fire  
I should've known all along  
You watch me burn in the fire
