

We Kept the Lights On

Milo Greene

We kept all of the lights on
To see our faces
You tried to keep your voice down
And settle the score
Are we [?]
Are we, will you tell me
Maybe it's not my fault

You keep running, running
You keep running, running
You keep running back to me
You keep running, running
You keep running, running
You keep running back to me

Right now you are shut down
You're not responding
The chance of this resolving
Is already gone
Finally you [?]
Finally you're catching up
Maybe I'm gone for good

You keep running, running
You keep running, running
You keep running back to me
You keep running, running
You keep running, running
You keep running back to me

You keep running back to me
You keep running back to me
You keep running back to me
You keep running back to me
We kept all of the lights on
