

You say where you're from
Love always gets complicated
But I say twenty one
Is way too soon to be so jaded

When I get my degree
You're the girl I want to marry
Stick around and see
Just how much this boy can carry

So you might think a love
Could never be this clear and simple
Trying long enough
To wrap my head around this riddle
I believe in us
Let me put this clear and simple
I believe in us

We know where we're going
Life sure can get complicated
A couple kids, a home
Nine-to-fives and bills to pay

With all of this going on
We might lose sight of us
But we won't be going under
No, we won't be giving up

So you might think a love
Could never be this clear and simple
Trying long enough
To wrap my head around this riddle
I believe in us
Let me put this clear and simple
I believe in us

In the sunset of our lives
We're slowing down
Now what's the hurry
We hold each other tight
And letting go of all those worries

So you might think a love
Could never be this clear and simple
Trying long enough
We wrapped our head around this riddle
I believe in us
Let me put this clear and simple
I believe in us
