

Learning How to Disappear

Milow

In the California'one night I was out walking
Looking for a sob felt to earn
All the palm trees bending to my will
Rat tails circles in the kale
And the big black of the universe gave up

I'm changing, changing my deal
And a stranger, a stranger I feel

Let's get out of here
Let's get out of here
Learning, learning, learning how to disappear

Now I'm wondering what it is I'm doing
I'm wondering who I am
And I stay up all night dancing in the sand
I'll be curled up by the fire dreaming like a dog
And I feel like this failed angels understands

That I'm changing, changing my deal
And a stranger, a stranger I feel

Let's get out of here
Let's get out of here
Learning, learning, learning how to disappear

Yes, I am learning, learning how to disappear
Disappear

In the fever lost where the olive grows
Where the martyrs watch their fell
In the desert between heaven, between hell
Where the wind tin top and the dogs went mad
And we're falling all around
And it was above as it is below and underneath the ground

I'm changing, changing my deal
And a stranger, a stranger I feel

Let's get out of here
Let's get out of here
Learning, learning, learning how to disappear

I am learning, learning how to disappear
Deciding, learning, learning how to disappear
