

Erase You

Mimi Webb

I'm spending money on some bags and some nights out
Erased your texts, got some room for some numbers now
You, you, you know what it is
Ooh, it goes like this

I could kiss a hundred different people, have a new one every night
Hear them screaming out my name, doing all that shit you like
Take a million different pictures 'til your face is out my mind
Know you'll think I'm only tryna replace you, I'm gonna erase you

I'ma go to every party, drinking like a hobby
I'll forget your name, I'm gonna erase you
I'ma kill him with that red dress, dancing like a hot mess
Make him go insane, I'm gonna erase you

I'm spending minutes on some calls with some new love (New love)
Only thing he knows about you's how you fucked up
You, you, you know what it is (You, you, you know what it is)
Ooh, it goes like this

Already cried my tears, baby, they're all dry
No more left to go (Go)
Next few years, be the time of my life
But you won't get to know

I could kiss a hundred different people, have a new one every night
Hear them screaming out my name, doing all that shit you like
Take a million different pictures 'til your face is out my mind
Know you'll think I'm only tryna replace you, I'm gonna erase you

I'ma go to every party, drinking like a hobby
I'll forget your name, I'm gonna erase you
I'ma kill him with that red dress, dancing like a hot mess
Make him go insane, I'm gonna erase you

Already cried my tears, baby, they're all dry
No more left to go
I'm gonna erase you
Next few years, be the time of my life
'Cause you won't get to know
I'm gonna erase you
