Red Flags

Mimi Webb

Well the first time we went out
You said you'd never settle down
Without a doubt
You said your ex still comes around
I found her things around your house
What's that about?

Don't take a genius, yeah, I see it
Even my friends hate that I'm with you
A million reasons, should be leaving
I need more hands to count all the issues

But I keep on running through these red flags
I blame myself 'cause I know it's bad
But I keep on running through these red flags
I see the signs but I still come back
I keep on running through them when you're
Touching my body, I
Listen to nobody and
Nobody can stop me
I keep on running through these red flags
I see the signs but I still come back
So I keep on running

You're living at your parents' place
You said you'll never move away
Guess that's okay
The dinner bill I have to pay
'Cause with you I like the taste
Just keep the change

Don't take a genius, yeah, I see it
Even my friends hate that I'm with you
A million reasons, should be leaving
I need more hands to count all the issues

But I keep on running through these red flags
I blame myself 'cause I know it's bad
But I keep on running through these red flags
I see the signs but I still come back
I keep on running through them when you're
Touching my body, I
Listen to nobody and
Nobody can stop me
I keep on running through these red flags
I see the signs but I still come back
So I keep on running

So I keep on running through these red flags
So I keep on running
