Activate

Take me to the future.  
I hear that's where it's at.  
Take me to infinity.  
I want a new format.

Upgrade all of my hardware,  
And even my software too.  
Take me to eternity.  
Take me along with you.

Move me beyond the past.  
I've got a new design.  
My form can ride the waves,  
And I can read the sines.

Let's move beyond.  
Let's activate.  
Let's move beyond.  
Let's activate.

To a better place.  
To a better state.  
Now is the time.  
For what we create.  
Let's energize.  
Let's activate.

Activate!

I've found the perfect sample,  
And the rate is just right.  
The frequency is ample,  
And the vibration is tight.

Just one more byte to load,  
And I'll transcend the past.  
You know I always told you,  
That we were made to last.

The transfer is waiting.  
I'm ready for the splice.  
My alignment is in phase,  
And the coding is precise.

Let's move beyond.  
Let's activate.  
Let's move beyond.  
Let's activate.

To a better place.  
To a better state.  
Now is the time.  
For what we create.  
Let's energize.  
Let's activate.

Activate!  
The transfer is waiting.  
I'm ready for the splice.  
My alignment is in phase,  
And the coding is precise.

To a better place.  
To a better state.  
Now is the time.  
For what we create.  
Let's energize.  
Let's activate.

Too smart to die.  
It's never too late.  
If only we try.  
Let's perpetuate.  
Too strong to fall.  
There's no need to wait.  
We can have it all.  
We can have it all.  
...

To a better place.  
To a better state.  
Now is the time.  
For what we create.  
Let's energize.  
Let's activate.
