

WATCHDOG

Mind's Eye

Never good enough
For a night walk
But I'm always there
To help you cool off

You think I'm
Voyeuristic
But I'm a watch dog
Someone's gotta be there when you
Let me fall off

I can't talk it out
I can't get away from you
You can't go without me
But I can't think about that anymore

You think I'm watching you
I see you looking too
Be both can't leave anything alone
I might be
Masochistic
I'm just a watch dog
Look at both of us trying not to care

I can't talk it out
I can't get away from you
You can't go without without me
But I can't think about that anymore

I can't talk it out
I can't get away from you
You can't go without without me
But I can't think about that anymore

I can't talk it out
I can't get away from you
You can't go without without me
But I can't think about that anymore

I can't talk it out
I can't get away from you
You can't go without without me
But I can't think about that anymore
