

Bluebird

Mindy Gledhill

Bluebird in a cage
I set you free and then you fly back into captivity
Why you gotta be afraid
When freedom pulls apart the threads of your impassivity?

You don't have to wait for the man
Who says he holds the keys in his hand
Get along, get along and find your song
Little bluebird

Always on display
You've never seen the view without those lines right in front of you
You just gotta find a way
To lift the latch and take your place out under the open skyline

You don't have to wait for the man
Who says he holds the keys in his hand
Get along, get along and find your song
Little bluebird

The windup clock upon the wall is calling
But time is not the enemy
You and time must learn to get along
Get along, get along and find your song
Little bluebird

You don't have to wait for the man
Who says he holds the keys in his hand
Get along, get along and find your song
Get along, get along and find your song
Get along, get along and find your song
Little bluebird
