

I Always Will

Mindy Smith

When morning comes up over the hill
And leaves you a new day on your windowsill
Know I love you still
Ooh, and I always will

When the stars steal the sky up over the hill
And the moon rests there gently on your windowsill
Know I love you still
Ooh, and I always will

Wherever life goes know you're not alone
Sunlight, shadows, even when the wind blows

The sun circles back up over the hill
And brings you a new day on your windowsill
Ooh, and I love you still
And I always will

Ooh, I love you still
And I always will
