

Think About U

Minelli

Now I only, only think about you

In my head, all alone with my feelings
In my bed, tell me I'm only dreaming
It's all I see, yeah, all I need is you, is you

When you're touching me
All the background noises turn to melodies
I can't hear the voices 'cause
Everything that I do, I only think about you
When you're touching me

Now I only, only think about you, you, you, you
On and on and on, I think about you, you, you, you
Don't know how to lie about it, so addicted to you
Everything that I do, I think about you, you, you, you
Now I only, only think about you, you, you, you
On and on and on, I think about you, you, you, you
Don't know how to lie about it, so addicted to you
Everything that I do, I think about you, think about you

Love me slow, I don't care where we're going
Take me home, baby I'm going all in
'Cause all I see, yeah, all I need is you, is you

When you're touching me
All the background noises turn to melodies
I can't hear the voices 'cause
Everything that I do, I only think about you
When you're touching me

Now I only, only think about you, you, you, you
On and on and on, I think about you, you, you, you
Don't know how to lie about it, so addicted to you
Everything that I do, I think about you, you, you, you
Now I only, only think about you, you, you, you
On and on and on, I think about you, you, you, you
Don't know how to lie about it, so addicted to you
Everything that I do, I think about you, think about you

When you're touching me
All the background noises turn to melodies
I can't hear the voices 'cause
Everything that I do, I only think about you
When you're touching me

Now I only, only think about you, you, you, you
On and on and on, I think about you, you, you, you
Don't know how to lie about it, so addicted to you
Everything that I do, I think about you, you, you, you
Now I only, only think about you, you, you, you
