

Wait for You

Mint Royale

Did you find
What you came for?
With all your storybooks and plastic friends
Don't you want anymore?
Your life is just a production line
Calling, texting people overtime
Things move on, I need something new
I've changed my plans
And I won't wait for you
I won't wait for you
And I won't wait for you

You always want
What you don't have
You're stuck with being someone else
Better live in the past
The crush of people makes you feel safe
Even when they turn you the other way
Changing paths makes you feel blue
But you're standing still
And I won't wait for you

Don't leave your soul behind
Bring your head down from the clouds
Don't trust everything you see
Or take anything from me

Does your life
Meet your design?
Hoping that the haze will lift
And you'll begin to shine
Don't need to blame yourself no more
Take good from things that you ignore
Your spark's near gone, don't fade from view
But it's too late now
I won't wait for you

Don't leave your soul behind
Bring your head down from the clouds
Don't trust everything you see
Or take anything from me
