Minuit

set me any task

this girl was built to last

assholes of the world unite together

and hunt in packs

fear does not just appear

it has a source

and tracking it down

is simply a matter of course

it doesn't matter of course

just throw it over your shoulder

like salt and bad luck

one day you will be older

then you will be old enough

i've heard it many times millennium,

2000 year trance

i just want to get busy and dance

i just want to, i just like to, i just want to get busy
and dance and dance

aires and extremities hard to follow remedies
